

BIBEK GHIMIRE

Cybersecurity Analyst | SOC Analyst | Security Operations

Woodside, Queens, NY | ghimirebibe0227@gmail.com | linkedin.com/in/bibekghimire33 | github.com/Beebek-G

PROFESSIONAL SUMMARY

Cybersecurity graduate (A.A.S., LaGuardia Community College | GPA: 3.53) transferring to John Jay College, with professional IT experience in Nepal and extensive hands-on training in network security, digital forensics, and penetration testing. Completed 10+ forensic investigation labs and competed in a Capture the Flag (CTF) competition applying skills across cryptography, web security, OSINT, and reverse engineering. Proficient in Kali Linux, Wireshark, Nmap, Metasploit, and Autopsy. Multilingual (Nepali, Hindi, English, Mandarin) seeking a cybersecurity internship or entry-level SOC/analyst role.

TECHNICAL SKILLS

Operating Systems: Kali Linux, Ubuntu, Windows Server 2019, macOS (Apple M3/UTM)

Security Tools: Wireshark, Nmap, Metasploit, Autopsy, Burp Suite, Steghide, Paraben P2 Commander, Netcat

Networking: TCP/IP, DNS, HTTP/S, OSI Model, VPN, Firewalls, ACL, VLANs, Routing & Switching, Wireless Security, Client-Server Architecture

Security Concepts: Incident Response, Digital Forensics, Penetration Testing, Risk Management, Cryptography, IAM, CIA Triad, OWASP Top 10, MITRE ATT&CK

Systems & Admin: Active Directory, Windows Server 2019, UNIX/Linux CLI, Bash, Hardware Troubleshooting, VirtualBox, UTM, Azure (intro)

Programming & Web: Python, C++, Bash, HTML, CSS, Bootstrap, SQL/MySQL, JavaScript (intro)

Design Tools: Photoshop, CorelDraw, Illustrator (Graphic Design)

Platforms: TryHackMe, Hack The Box, GitHub

Languages: Nepali (Native), Hindi (Fluent), English (Fluent), Mandarin Chinese (Elementary)

EDUCATION

John Jay College of Criminal Justice, CUNY — New York, NY

Expected 2028

Bachelor of Science in Cybersecurity | Transferring Fall 2026

LaGuardia Community College, CUNY — Long Island City, NY

Graduated June 18, 2026

Associate in Applied Science (A.A.S.) — Cybersecurity | GPA: 3.53 / 4.0

Relevant Coursework: Digital Forensics · Advanced Network Security · Advanced Systems Security · Data Communications & Network Security · Windows Server 2019 · UNIX/Linux Systems · Cryptography · Computer Security · Database Management · Python Programming

WORK EXPERIENCE

Assistant Web Designer | DIT Solution Pvt. Ltd, Kathmandu, Nepal

Aug 2022 – Nov 2023

- Developed and deployed responsive websites using HTML, CSS, Bootstrap, and JavaScript for clients across multiple industries, ensuring cross-browser compatibility and mobile-friendly design.
- Provided IT administration support including hardware troubleshooting, network configuration, and software installation for office systems and client environments.
- Created professional graphic design assets using Photoshop, CorelDraw, and Illustrator including color gradients, layouts, and branding materials for client projects.
- Collaborated on full-stack development projects involving MySQL database integration, contributing to multiple successful client deliverables under company deadlines.

Crew Member | Dunkin', Queens, NY

July 2024 – Present

- Maintained consistent customer service excellence in a high-volume environment (100+ customers/day) while managing concurrent responsibilities across cashier, food preparation, and customer service roles.
- Sustained full-time academic enrollment in a competitive cybersecurity program while working 25–40 hours per week, demonstrating exceptional time management and professional commitment.
- Managed cash handling and point-of-sale transactions with complete accuracy, reinforcing data-integrity and accountability habits applicable to security operations work.

PROJECTS, LABS & COMPETITIONS

Kean University CTF Competition — LaGuardia CC Cybersecurity Program

March 2026

- Competed in Kean CTF as primary active team member, applying cybersecurity skills across multiple challenge categories in a timed, competitive environment against college teams.
- Solved challenges spanning cryptography, web security, digital forensics, reverse engineering, and OSINT — demonstrating broad technical knowledge across core security domains.
- Independently drove team progress after teammates became unavailable mid-competition, demonstrating self-reliance and problem-solving under pressure.

Digital Forensics Investigation Lab Series — MAC 257, LaGuardia CC

Spring 2026

- Executed 10 forensic investigations across Windows, Linux, mobile, email, and network platforms using Autopsy, Paraben P2 Commander, and Steghide.
- Applied the Daubert Standard to evaluate digital evidence admissibility; produced formal evidentiary reports documenting findings, methodology, and chain of custody.
- Recovered deleted, encrypted, and damaged files from forensic disk images using industry-standard acquisition and evidence preservation techniques.
- Conducted incident response investigation for a suspicious logon event; decoded FTP protocol sessions and identified indicators of compromise (IOCs) across Windows and Linux systems.

Network Security Lab Series — MAC 245 & MAC 246, LaGuardia CC

Fall 2025 – Spring 2026

- Configured firewalls, ACLs, and VPNs on Cisco hardware to enforce network segmentation and access control in a simulated enterprise environment.
- Conducted penetration testing using Kali Linux (Nmap, Metasploit) against vulnerable VMs to identify, exploit, and document security weaknesses.
- Analyzed Wireshark packet captures to identify anomalous traffic and simulated DNS and DoS attacks to evaluate defensive countermeasures.

Personal Home Lab — Independent Security Practice

2024 – Present

- Built a virtualization lab on Apple M3 using UTM and VirtualBox running Kali Linux and Ubuntu for independent offensive and defensive security practice.
- Completed TryHackMe rooms: Defensive Security Intro (SOC, SIEM, threat intelligence), Offensive Security Intro, Networking Fundamentals, and Careers in Cyber.
- Actively practicing on Hack The Box to develop penetration testing skills in a structured, challenge-based environment.

CERTIFICATIONS & TRAINING

- A+ Hardware & Networking — DIT Solution, Kathmandu, Nepal (Jan – Apr 2020) | Hardware, Windows installation, client-server networking
- C++ & Python Programming — DIT Solution, Kathmandu, Nepal (Mar – Dec 2020) | OOP, data structures, MySQL integration
- Web Designing & Graphic Design — DIT Solution, Kathmandu, Nepal (Aug 2021 – Jul 2022) | HTML, CSS, Bootstrap, Java, Photoshop, MySQL
- Python Bootcamp: Learn Python from Scratch — CodeWithHarry (September 2025)
- Forensics: Hiding Data in Unsuspected Files — ThriveDX / RISE Hackathon Webinar (August 2022)
- CUNY Cybersecurity Awareness Training — LaGuardia Community College (October 2025)
- Active Shooter Response Training — CUNY / LaGuardia Community College (June 2026)
